The Original Track Guided Blind System

THE NAME **SYNONYMOUS** WITH TRACK GUIDED BLIND SYSTEMS

20 YEARS OF INNOVATION

Since it revolutionised the blinds industry in year 2000, Ziptrak® has continued to delight homeowners with its easy, one-handed, leave-at-any-height, spring-balanced manual system. Homeowners today get to choose from manual or motorised Ziptrak® blinds, while enjoying the same strength and durability that make Ziptrak® the trusted brand for end-customers and every business within the Ziptrak® network. Ziptrak's dedication to innovation is apparent from its numerous patent-protected technology.

In fact, Ziptrak® is so serious about perfecting its system that it has a dedicated Research and Development facility located within its headquarters in Australia.

"Each day, we research, design and develop industry leading products that enhance the lifestyle of people looking for protection from the elements in their home or commercial environments."

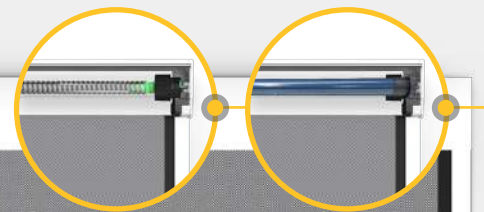

Tony de Maaijer
Founder & Inventor of Ziptrak®

PATENTED SIDE SPLINE

Consisting of a PVC core, encased by abrasion-resistant Cordura® and double welded to the fabric, for the toughest system in the market.

MANUAL OR MOTORISED

Ziptrak® blinds can be easily manoeuvred using the manual SuperSpring system, or motorised with Somfy® or Dooya® motors.

THE ZIPTRAK® DIFFERENCE

QUALITY FINISH

Blinds provide an aesthetic accent to your space, so it's important that they look good whilst providing protection. Our blinds are made with great attention to detail; even the tiniest components, such as rivets, are **powder-coated and color-matched** to give your blinds a seamless look.

WRINKLE-FREE BLINDS

The patented side spline is a defining feature of Ziptrak® blinds. Designed to keep the fabric firmly within the tracks, it has been shown to be able to withstand strong winds in TÜV SÜD PSB tests. It also ensures **a smooth and wrinkle-free blind for years to come.**

FABRIC OPTIONS

Choose from a wide range of fabrics to meet your functional and aesthetic requirements. Whether it's rain protection, sun shading or complete privacy you seek, our fabrics will deliver what you need, in the colours you pick.

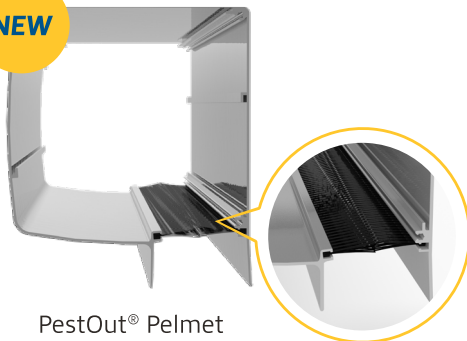

ENJOY UNINTERRUPTED VIEWS

Ziptrak's **PanoView®** blinds are designed to go **up to 6m wide** without a centre post in between even in high-rise apartments - an industry's first!

6m

NEW

PestOut® Pelmet

LOW MAINTENANCE

Ziptrak® is designed to withstand nature's elements. Our **PestOut® pelmet** also prevents insects from building nests in the pelmet, and brushes the fabric each time you move your blinds.

PROVEN DURABILITY & STRENGTH

Each and every component in our system is carefully selected for its strength, durability and resistance to rust. This is why Ziptrak® blinds have been shown to be able to **withstand static wind loads of up to 260km/hr!**

REDEFINE YOUR SPACE

Make full use of the space you've paid for, come rain or shine. Ziptrak® blinds help you maximise the use of your semi-outdoor space, by creating a physical barrier from lashing rains, scorching sun, flying insects, dust and other debris, as well as unpleasant smells. Spend less time cleaning, and more time enjoying your new space!

RELAXATION ZONE

Featuring: 1% Polyweave fabric for protection from UV and dust, while maintaining excellent views whether your blinds are up or down.

HOME OFFICE

Featuring: RainOut® Frosted fabric to keep your electronics and documents dry from the rain, and cut out glare when you need to focus.

DINING & ENTERTAINMENT

Featuring: Ziptrak's PanoView® for uninterrupted views. Fits spaces up to 6m wide; no need for posts in between.

CHILDREN'S PLAY AREA

Featuring: Manual Ziptrak® SuperSpring blinds with Child Safety Latch engaged to keep your blinds from going above railing height.

TO PURCHASE ZIPTRAK®

STEP
1

SCHEDULE A SITE VISIT

Each Ziptrak® blind is custom made to fit your site specifications and individual needs. Besides taking measurements, our Authorised Retailers can offer suggestions on how best to configure Ziptrak® for your space, and answer any questions you might have.

STEP
2

SELECT YOUR DESIRED FABRIC TYPE ¹

5% PolyWeave

For some privacy, glare reduction, sun protection, and light rain protection.

1% PolyWeave/ FiberWeave

For a good balance of privacy, external visibility and rain protection.

RainOut® Frosted

For exceptional rain protection, while allowing light to pass through.

RainOut® Blackout

For exceptional rain protection & light blockage.

Clear/Tinted PVC

Maximum views and rain protection while blocking out UV rays.

MAKE ADDITIONAL CUSTOMISATIONS

The colour of your fabric and hardware, pelmet, and bottom bar can also be customised in a variety of options. Speak with one of our Ziptrak® Authorised Retailers today to find out more.

¹ Fabric and track colours for condominium apartments in Singapore are determined by the Management Corporation Strata Title (MCST).

Ziptrak® blinds can be effective in keeping out rain, but it does not guarantee 100% watertightness. The amount of rain protection will be largely determined by the fabric you choose, but some water may still enter via the Ziptrak® system during heavy rain and windy conditions.

ASK FOR **GENUINE** ZIPTRAK®

They say that imitation is the highest form of flattery...

We're flattered that Ziptrak® has become synonymous with track guided blind systems, with many using the terms "ziptrack" or "zip blinds" as a noun.

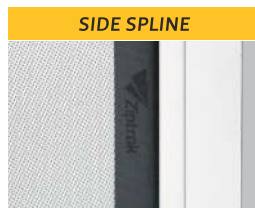

Please follow the following steps to ensure that you will receive the product you desire and deserve:

1. Find an Authorised Retailer via our official page at sg.ziptrak.com (Singapore) or my.ziptrak.com (Malaysia).
2. Ask your Retailer if they sell the **genuine and patented Ziptrak®** system from Australia.
3. Ask that your **quotation and invoice** include the Ziptrak® brand name and ensure that it is spelt correctly.

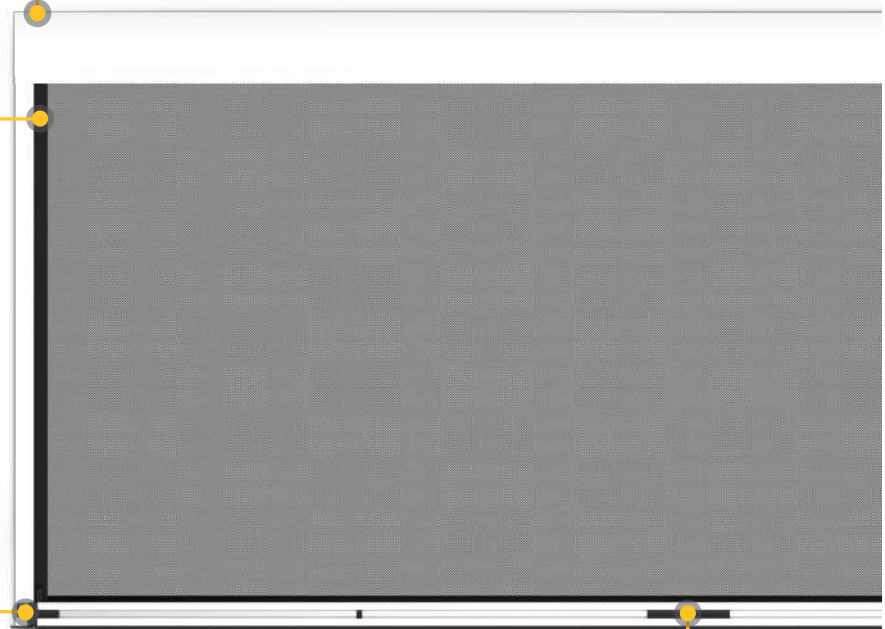

IDENTIFYING **GENUINE** ZIPTRAK® OUTDOOR BLINDS

Once installed, **check** that you have received the genuine Ziptrak® system by ensuring all of the parts illustrated have the Ziptrak® marking.
